Sample job ad for Junior Structural Engineer

GREEN CONSTRUCTIONS

Green Constructions is more than just a construction company. We strive to build ethical and sustainable residential buildings. We are at the cutting edge of creating incredible homes that are resource efficient throughout their life cycle. Our award-winning team of innovative architects and engineers saw Green Constructions win the 2014 award for our prototype net-zero energy home.

The job: We are looking for a Structural Engineer with a soul for sustainable technologies. You will be meticulous in your dedication to the highest functional design, whilst adhering to sustainable principles.

You will assist and be mentored by our Senior Structural Engineers, in the design of our clients' homes. As you develop, you will consult with clients and industry in best practice sustainable engineering.

Essential criteria:

- CPEng
- Sound knowledge of Green Engineering, across waste reduction, materials, energy conservation and indoor environmental quality
- Leadership skills
- Commitment to best practice principles in all work
- Demonstrated initiative with a solution focus
- Strong communication skills
- Proficiency with RC Building, Slabs or Strand 7 structural software

Apply: Please click 'Apply' button to complete your application. To arrange a confidential conversation, please contact Harper Edwards, hedwards@greenconstructions.com.au or 0400 000 000
